EDUCATION

Dual Bachelor of Science, Cybersecurity and Networking **Expected Graduation: May 2027**
University of Cincinnati, Cincinnati, OH **GPA 3.98**

Associates of Science, Cybersecurity and Networking **Graduation date: May 2024**
Southern State Community College, Hillsboro, OH **GPA 3.93**

- Phi Theta Kappa Honnor Society | Vice President of Service
- All-Ohio Academic Team

EXPERIENCE

Information Technology Engineer **January 2025 - Present**
Ahresty Wilmington Corporation, Wilmington, OH

- Oversee cybersecurity operations by identifying vulnerabilities, coordinating remediation efforts, implementing security best practices, and strengthening the organization's overall security posture.
- Administer identity and access management for ~350 users through Active Directory and Group Policy, managing user accounts, permissions, and security policies.
- Manage and supported the Meraki Networking environment and collaborated on Microsoft and Cisco infrastructure, including VLANs, routing, and ASA management
- Maintain and support 50+Windows Server environments, including backup operations and system reliability
- Manage enterprise patching for Windows OS and third-party patching applications across 350+ endpoints and 50+ servers
- Ensure high availability and security of business-critical systems by maintaining IT infrastructure and software
- Provide advanced technical expertise and recommendations for IT networking projects and system enhancements
- Identify and implement process improvements to enhance business efficiency and IT operations
- Produce technical documentation for applications and procedures, serving as a liaison with vendors and consultants.
- Provide on-call support for infrastructure, network, and system incidents, troubleshooting and resolving issues impacting business operations

Information Technology Intern **May 2023 – July 2023 | May 2024 – July 2024**
Ahresty Wilmington Corporation, Wilmington, OH

- Network Security: Implemented Access Control Lists (ACLs) to improve network security and manage traffic
- Switch Configuration & Monitoring: Configured switches and addressed performance alerts
- Network Optimization: Removed unused devices to enhance port management and network security
- Server Maintenance & Backups: Performed updates, created backups, and ensured system reliability
- Device Deployment & Inventory: Installed hardware and managed IT inventories to improve operational efficiency
- Threat Detection & Response: Diagnosed and mitigated security threats using antivirus and cybersecurity tools
- System admin – Help Desk

PROJECTS

Cybersecurity Risk Assessment and Incident Response Plan Development (NIST based) **February 2024 – May 2024**

- Conducted a comprehensive cybersecurity risk assessment across three interconnected organizations
- Developed an incident response plan in alignment with NIST guidelines, addressing critical areas
- Additionally, recommended and implemented key security upgrades to enhance overall security posture

Homelab Infrastructure & Technical Projects **December 2025 – Present**

- Built and maintain a virtualized homelab environment using Proxmox, simulating enterprise infrastructure including Active Directory, Windows Servers, and network segmentation
- Configured and tested network security and authentication solutions, including VLANS, and physical switch deployment and configuration
- Implemented system hardening and security best practices, including access control, patching, and network restrictions

SKILLS

- **Technical:** System Administration, Active Directory, Network Security (Access Control Lists, Firewall Configuration), Switch Configuration & Performance Monitoring, Incident Response (NIST Guidelines), Cybersecurity Risk Assessment, Server Maintenance & Backup Management, Traffic Management Protocols, Virus Detection & Threat Response, Device Deployment & Inventory Management, Virtualization (Proxmox Lab), SIEM Tools, Cloud Security, Encryption & Cryptography, VPN Management, Web Application Security, Microsoft LAPS, BitLocker, NPS/RADIUS, Security baselines, Endpoint hardening, Microsoft Office Suite
